### About This Game

**Dive in to help Freddi Fish and Luther keep the ocean from draining and save the sea creatures!**

Luther's got to pop an ocean full of air bubbles before they make it to the surface. A souped-up slingshot, a little fancy finwork and some help from you are all he'll need! Sea sponges, boulders and teleporting whirlpools are some of the useful tools you'll need to succeed. Stinging jellyfish, spraying octopi and smelly seaweed are the least of Luther's Water Worries!

- Save your game after each level and track the scores of up to 75 players

i remember playing this on the disc for that fat old macintosh computer. the nostalgia is unreal but for some reason i figured the graphics would look better. just shows how much imagination you have as a kid... You're not a true gamer until you've beaten this game

Change my mind!

Minimum PC: RTX 2080Ti / i9 9900K / 16gb RAM - Win 10 64bit

Recommended PC: Nvidia TNT2 / Pentium III / 128mb RAM - Win 98. What am I doing with my life.....

.....wasting my money is what I'm doing. I have played allot of games in my life but i never felt i would feel high on 4/20 in my life 10/10 best game to play on 4/20. I played about 20 minutes of this and I think that's about all it's worth. It's not very engaging and I have no memory of playing this one when I was younger. At least with Maze Madness there were designed levels, this is just very arcadey and bland.. great and and deep stroy it's a must buy. Game was pretty fantastic, had lots of fun shooting bubbles, would play game again except for no gender options, why am I fish when i sexually identify as a water bottle 0/10. i mean it's alright. You're not a true gamer until you've beaten this game

#### **New Update and New Languages Available:**

Hello Everyone,

A new update for Freddi Fish and Luther's Water Worries is now available which contains the following:

- I have updated ScummVM from 1.6.0 to 1.7.0 across Windows, OS X and GNU/Linux.
- opengl\_nearest is the new display renderer. This provides really sharp looking graphics and also ensures 100% Steam Overlay functionality for Windows. It runs at your monitors current resolution.
- I have completely re-written the shell launcher for GNU/Linux and implemented a new libraries system. This should allow for many more users of GNU/Linux to play the game and not just people on the latest versions of Ubuntu and Mint.
- The Modern ScummVM skin now works on GNU/Linux. You can access the ScummVM menu by pressing CTRL+F5 (or Fn+F5 for Mac OS X) at any time.
- ScummVM source code has been updated to 1.7.0. SDL source code is now included.

Also, I'd like to officially announce that the Dutch and Russian versions of the game are now available for all customers.

Enjoy the update and thank you for playing :)

Night Dive Studios. **New Windows update:**

Also, Cloud Save Support has been added. Take your saves anywhere and play on any machine. Windows, MacOS or GNU/Linux!
